Address: Scheme No 136, Indore, MP, 452010

EXPERIENCE

EY LLP — Senior Consultant

August 2023 - PRESENT

Working as a fullstack developer. Worked on ReactJS, NodeJS, TypeScript, HTML, SASS.

Microsoft — Contractor via EY LLP

April 2024 - Sept 2025

Working as a frontend developer. Worked on NextJS, TypeScript, HTML, SASS, Material UI

Capgemini — Frontend Developer

March 2021 - August 2023

Working as a frontend developer. Worked on ReactJS, TypeScript, HTML, SASS.

Codoxy IT Solutions Pvt. Ltd. — Software Engineer

Jan 2020 - March 2021

Working as a Web developer. Worked on ReactJS, TypeScript, HTML5, SASS, Codeigniter (PHP).

EDUCATION

Acropolis Institute of Technology and Research, Indore — Bachelor of Engineering – 8.02 CGPA

Aug 2016 - Sept 2020

Rashtriya Vidya Mandir, Indore — Senior Secondary (PCM) – 80.4%

2016

Rashtriya Vidya Mandir, Indore — Higher Secondary – 84.8%

2014

SKILLS

Functional: Strategic/Tactical Planning, Communication and Interpretation skills, Focused, adaptive, Multi-tasking.

Technical: ReactJS, NextJS, NodeJS, HTML5/CSS3, BOOTSTRAP/ MUI/FLUENTUI/ Tailwind, TypeScript, ES6, Version Control (ADO, Github), CI/CD. Unit Testing (React Testing Library)

Tools: JIRA, Visual Studio Code, SQL Developer, Kanban Board, Source Tree.

TRAININGS, CERTIFICATES

MTA DATABASE Certification by Microsoft.

ReactJS course from Udemy.

Introduction to Front-end Development with ReactJS (Coursera).

LANGUAGES

Hindi (Fluent)

English (Fluent)

PROJECTS

Project: Climate Data Hub

UNFCCC Climate Data Hub brings official climate information from more than 190 countries into one accessible platform, making it easier for policymakers, researchers, civil society organizations, and advocates to analyze progress, identify needs, and make informed decisions.

Technology:

React, TypeScript, UI Performance Optimization, Data Visualization, Frontend Architecture

Responsibilities:

- Led frontend development as Frontend Lead for the UNFCCC Climate Data Hub
- Built data-driven modules with efficient state management and API integrations
- Contributed to frontend architecture, modular design, and code standardization
- Optimized performance using memoization, lazy loading, and render optimization techniques
- Improved UX through responsive design and efficient data handling for large datasets

Project: Customer Experience Platform (CEP)

The Customer Experience Platform (CEP) project was a multi-phased effort to provide a commodity, product, and business-segment agnostic platform. combined the Retail customer-facing Energy Manager, My Constellation, and Constellation Home digital tools into a single, state-of-the-art solution for all our customers, providing a unified experience for our customer base.

Technology:

NextJS, TypeScript, MUI, CICD, REST APIs

Responsibilities:

- Developed a unified customer platform using Next.js (App Router)
- Built modular, reusable components using React, TypeScript, and component-driven architecture
- Implemented API integrations with efficient data fetching and caching strategies
- Optimized performance using code splitting, lazy loading, and memoization techniques
- Managed state using centralized state management (Redux) for consistent data flow
- Ensured responsive and accessible UI using Material UI.
- Collaborated with backend, product, and QA teams to deliver scalable, enterprise-grade features

Project: Chitrlekha

Chitrlekha is an open source platform tool for video subtitling across various Indic languages, using ML model support. Chitrlekha offers support for multiple input sources (Ex : Youtube, local etc) and transcription generation process (Ex : Models, Source captions, Custom subtitle files etc).

Technology:

React, Video Processing APIs, TypeScript, MUI

Responsibilities:

- Developed frontend features using React and TypeScript for a video subtitling platform
- Integrated video processing and transcription APIs for subtitle generation workflows

- Implemented support for multiple input sources, including YouTube integration and local media uploads
- Built multilingual subtitle support with Unicode handling and dynamic text rendering
- Developed a custom subtitle editor with timeline synchronization and real-time updates

Project: Customer First

This is an automotive domain project focused on digitizing and managing end-to-end dealership operations. The platform centralizes all customer-related processes, covering the entire lifecycle—from customer onboarding and account creation to vehicle purchase and final delivery. The system integrates multiple business functions, including sales, customer relationship management, and order processing, into a single unified platform. This enables seamless data flow, improved visibility, and a consistent customer experience across all dealership touchpoints.

Technology:

ReactJS, TypeScript, MUI

Responsibilities:

- Developed UI features for a dealership management platform using React and TypeScript
- Implemented modules for customer onboarding, booking, and delivery workflows
- Built reusable components and assisted in maintaining a consistent UI structure
- Managed data flow using basic state management and API integration
- Collaborated with team members to deliver features and fix UI/performance issues

Project: Funmed

Funmed is a web application for Doctors and Patients to interact with each other online. Patients can get them registered and get the consultation for the Doctors. Doctors can create the diet charts, Reports, Health Index for their Patients.

Technology:

HTML, SASS, Tailwind, ReactJS, REST APIs

Responsibilities:

- Developed a platform enabling interaction between doctors and patients
- Implemented patient registration and consultation workflows
- Built features for doctors to manage diet charts, reports, and health indexes
- Ensured smooth data handling and user-friendly interface
